CIRCULAR

We are pleased to inform you that the Entrepreneurship Development Cell (EDC) is organizing a Workshop on "Youth Entrepreneurship Development" on 28-08-2019. This program aims to provide valuable insights and guidance on fostering entrepreneurial skills among the youth. We are honored to have Mr.Radha Krishna as the esteemed resource person for the seminar.

Your presence will contribute to the success of the event and provide an opportunity for networking and learning.

FEEDBACK

The youth entrepreneurship development program exhibits clear objectives aligned with participants' needs. The curriculum covers essential entrepreneurial facets with an innovative approach, blending theoretical knowledge and practical application. Engaging learning methods foster active participation, while mentorship structures and networking opportunities enhance support. The program's monitoring and evaluation mechanisms ensure continuous improvement, with an emphasis on long-term impact. Efforts towards accessibility, inclusivity, and sustainability contribute to a comprehensive, adaptable initiative. Stakeholder involvement and strategic partnerships further amplify its effectiveness, creating a robust framework for fostering entrepreneurial skills among youth.

FEEDBACK

Intellectual Property Rights (IPR) play a pivotal role in the innovation management of technical collaboration frameworks, providing a structured mechanism to safeguard and leverage novel ideas. In the context of a program, IPR serves as the bedrock for fostering innovation by establishing clear ownership and rights over intellectual assets. This, in turn, encourages stakeholders to contribute their expertise without fear of exploitation. By offering legal protection for inventions and innovations, IPR incentivizes organizations to engage in collaborative ventures, knowing that their contributions are duly recognized and shielded from unauthorized use. This not only promotes a culture of innovation but also attracts diverse talents and resources to the program, fostering a dynamic ecosystem where technical advancements can flourish. In essence, IPR in innovation management serves as the cornerstone for effective and mutually beneficial technical collaborations, driving progress and excellence in shared endeavors.

Dear Faculty,

This is to inform all the faculty and students of MTCET that the Research and Development Department is organizing a Two Day Talk on "CONDITION MONITORING OF TRANSMISSION LINE COMPONENTS WITH REMOTE SENSING TECHNOLOGIES." The session will be conducted by Mr. MURALI KRISHNA BODDU, a distinguished expert in the field on 15/11/2019 – 16/11/2019.

FEEDBACK

The program focusing on the condition monitoring of transmission line components with remote sensing technologies is a commendable initiative at the intersection of cutting-edge technology and infrastructure management. By integrating remote sensing technologies, the program aims to revolutionize the way we monitor and maintain crucial elements of power transmission lines. Furthermore, the use of remote sensing technologies aligns with the broader trend of leveraging data-driven approaches in the management of critical infrastructure. The program's focus on innovation in monitoring techniques demonstrates a forward-looking approach to addressing the challenges of maintaining transmission lines, ultimately contributing to the sustainability and efficiency of power distribution networks. As the energy sector continues to evolve, this initiative holds promise for not only optimizing operational costs but also advancing the overall reliability and longevity of transmission infrastructure.

PROGRAMME REPORT

NAME OF THE PROGRAMME : CONDITION MONITORING OF TRANSMISSION LINE COMPONENTS WITH REMOTE SENSING TECHNOLOGIES.

DATE : 15/11/2019 - 16/11/2019

RESOURCE PERSON : **Mr. MURALI KRISHNA BODDU**

PROGRAMME OBJECTIVE :

Inspection and Monitoring Technologies of Transmission Lines with Remote Sensing helps Readers build a thorough understanding of new technologies.

TOPIC COVERED :

Transmission lines carry electric energy from one point to another in an electric power system. They can carry alternating current or direct current or a system a combination of both.

PROGRAMME OUTCOME :

- Increased awareness of the importance of condition monitoring in transmission lines.
- Knowledge of remote sensing technologies and their applications in monitoring transmission line components.
- Familiarity with the latest tools and methodologies for assessing the health of transmission line components.
- Insights from real-world applications and success stories in the field.
- Enhanced networking opportunities for collaboration and knowledge exchange.

About the College:

Mother Theresa College of Engineering & Technology (MTEC) was established in the year 1999. It has a well-planned campus with pollution free environment. It is located at Peddabonkur of Peddapalli district (Telangana). MTCET has emerged as a pioneer venture in the field of Technological Education, one of the most well organized institutions in Telangana District(s). Aesthetically built buildings, well furnished lecture halls library, workshop, computer labs, Internet facility, Conference hall, Seminar hall, laboratories and spacious playground, indoor and outdoor sports facilities, intramural-extracurricular facilities, associated hostels and canteen in the campus, offer an ideal environment for pursuit of a professional career. MTEC has proven to be a turning point in the lives of many students, the place where many success stories begin.

About Program:

Technology collaboration and transfer is well structured and covers various aspects On IPRs that are concerned with the Protection of tangible and intangible property. IPRs that are concerned with the Protection of tangible and intangible Property.

FEEDBACK

The Startup & Entrepreneurship Development program is a commendable endeavor with the potential to catalyze economic growth and foster innovation. By nurturing the entrepreneurial spirit, this program aims to create a vibrant ecosystem that empowers individuals to transform innovative ideas into successful startups. The emphasis on skill development, mentorship, and access to resources aligns with the crucial needs of aspiring entrepreneurs, providing them with a robust foundation for sustainable business ventures. The program's focus on fostering a culture of innovation is particularly noteworthy, as it recognizes the role of startups in driving technological advancements, creating job opportunities, and contributing to overall economic development. By providing a structured framework for skill enhancement and mentorship, the program addresses the common challenges faced by startups, increasing their likelihood of success.

ABOUT INSTITUTE:

Trinity College of Engineering & Technology, Karimnagar has been structured to take head on the changing trends of technology. The idea of setting up the college emerged when no other college could cater to the needs of a student in his/her endeavor to acquire wholesome education. The very strength of Trinity lies in its principles of providing the right learning environment for the student who does not have to compromise throughout the learning process of becoming global citizen. Over the years since it was established, there has been dynamic progress at Trinity in all academic and research activities, and a parallel improvement in facilities and infrastructure, to keep it on par with the best institutions in India.

OBJECTIVE OF THE PROGRAMME:

An online shopping system permits a customer to submit online orders for items and/or services from a store. Usually, online shopping products are displayed and maintained on a web portal. A Web Portal is a type of Website. A Web Portal acts as a gateway to the internet. Web portals provide a single point of access to a variety of content and core services, and ideally offer a single sign-on point. The main challenge for online shopping portals is to provide security for the transactions involved. Customers usually need to enter their crucial information such as, credit card number, debit card number etc. to buy products. Today, most of the shopping portals make use of Secured Socket Layer (SSL) to transfer crucial data. Existing system was capable of providing a very good end-to-end security. But, it cannot encrypt only a part of information; hence a large cipher text is generated.

Who can attend?

Students from the Undergraduate, post-graduate, and Faculties of various institutions

FEEDBACK

The development of a secure web portal for online shopping is a laudable program that addresses critical aspects of e-commerce in today's digital landscape. The emphasis on security is particularly commendable, considering the rising concerns related to online transactions. The program's commitment to implementing robust security measures can instill confidence among users, fostering a trustworthy environment for online shopping. The integration of a secure web portal not only safeguards user data but also contributes to the overall resilience of the online marketplace. By implementing encryption, secure payment gateways, and stringent authentication processes, the program aims to mitigate potential cyber threats, protecting both consumers and businesses. This focus on security is essential in building a sustainable online shopping ecosystem, where users can confidently engage in transactions without compromising their privacy.

PROGRAMME REPORT

NAME OF THE PROGRAMME : SECURE WEB PORTAL FOR ONLINE SHOPPING

DATE : 28th January 2020

RESOURCE PERSON : Ms. Amathul Fouzia Begum

PROGRAMME OBJECTIVE :

This program aims to provide participants with a comprehensive understanding of the security aspects of online shopping portals, equipping them to contribute to a safer and more secure online retail environment.

TOPIC COVERD :

Challenges and solutions in securing mobile shopping Mobile payment security considerations

PROGRAMME OUTCOME :

- Technical skills for developing a secure web portal for online shopping.
- Knowledge of e-commerce security best practices and data protection.
- Understanding of user experience principles and interface design.
- Practical insights into managing and maintaining an online shopping platform securely.
- Networking opportunities and collaboration potential among participants.

About the College:

Mother Theresa College of Engineering & Technology (MTEC) was established in the year 1999. It has a well-planned campus with pollution free environment. It is located at Peddabonkur of Peddapalli district (Telangana). MTCET has emerged as a pioneer venture in the field of Technological Education, one of the most well organized institutions in Telangana District. Aesthetically built buildings, well furnished lecture halls, library, workshop, computer labs, Internet facility, Conference hall, Seminar hall, laboratories and spacious playground, indoor and outdoor sports facilities, intramural-extra curricular facilities, associated hostels and canteen in the campus, offer an ideal environment for pursuit of a professional career. MTEC has proved to be a turning point in the lives of many students, the place where many success stories begin.

FEEDBACK

The Entrepreneurship Development on Rural Perspective program is a visionary initiative that recognizes the untapped potential in rural communities and seeks to empower individuals with entrepreneurial skills. By focusing on entrepreneurship in rural areas, the program addresses socio-economic challenges and contributes to the overall development of these communities. The emphasis on rural perspectives is particularly noteworthy, as it acknowledges the unique dynamics, resources, and needs of rural settings. Furthermore, the program's integration of mentorship and networking opportunities can play a pivotal role in connecting aspiring rural entrepreneurs with experienced professionals, enabling knowledge transfer and fostering a supportive business ecosystem. This collaborative approach contributes to the resilience and long-term success of rural enterprises.

FEEDBACK

The program, "Transforming Dimensions of IPR - Prospectus," demonstrates a forward-thinking approach to Intellectual Property Rights (IPR) that acknowledges the evolving landscape of innovation and creativity. By adopting a transformative perspective, the program signals a commitment to staying abreast of contemporary challenges and opportunities in the realm of intellectual property. Moreover, the inclusion of "Prospectus" in the program's title implies a strategic vision for the future. This suggests a deliberate effort to not only understand the current state of IPR but also to anticipate and shape its future trajectories. By doing so, the program sets itself apart as a proactive and visionary initiative that seeks to empower participants with the knowledge and skills needed to navigate the evolving landscape of intellectual property.

A
ONE DAY NATIONAL LEVEL FREE WEBINAR
on
**-ONLINE TRAINING TECHNICAL STRATEGY
THROUGH GOOGLE MEET FOR TEACHERS-**

held on Friday 17 July 2020 (Timings 4.30pm - 6pm).

Through 

Resource Person

Dr. Johnson Y,
Associate Professor,
Lourdes Matha College of
Science and Technology,
Trivandrum, Kerala

About The Session:

- An awareness programme for teachers about the basics of Internet and various online apps.
- Requirement for online classes.
- Fundamentals of Internet.
- Familiarization of Google Tools including Google Meet.
- Familiarization of other online platform like WbEX, Zoom, GoTo Meetings etc.

Organized By Department of
MASTER OF BUSINESS ADMINISTRATION
MOTHER THERESSA
COLLEGE OF ENGINEERING & TECHNOLOGY
Approved by AICTE, Affiliated to JNTU - HYD, Peddapalli (Dist), Telangana State. 505172.

About the Department of Master of Business Administration (MBA)

The Master of Business Administration Post programme approved by AICTE, affiliated to JNTU, Hyderabad. The department equipped with qualified experienced faculty, conducting extra classes by providing live projects of industries through industrial visits. MTEC is proud & happy to announce we achieved of "District Topper Rank" in MBA from its First batch in recently held MBA University Exams and placed many MNC companies ad they are good positions. Our Students have been achieved outstanding results in last five academic years result percentage has been enhanced significantly to 95% on whole.

About Our Institution

Mother Theresa College of Engineering & Technology (MTEC) was established in the year 1999. It has a well-planned campus with pollution free environment. It is located at Peddapalli Telangana State, India. MTEC has emerged as a pioneer venture in the field of Technological Education, one of the most well organized institutions in Telangana District(s).

Aesthetically built buildings, well furnished lecture halls, library, workshop, computer labs, Internet facility, Seminar hall, laboratories and spacious play ground, indoor and outdoor sports facilities, associated hostels and canteen in the campus, offer an ideal environment for pursuit of a professional career. MTEC has proven to be a turning point in the lives of many students, the place where many success f stories begin.

WHO CAN APPLY?

- The faculty members of all disciplines are eligible .
- E-Certificate will issue who register.

HOW TO APPLY:

- By Registration Link.

FEEDBACK

The "Online Training Technical Strategy through Google Meet for Teachers" program is a timely and impactful initiative that addresses the growing need for effective online education. The choice of Google Meet as the platform for technical training indicates a practical and accessible approach, leveraging widely-used tools for seamless collaboration and learning.

One of the program's strengths lies in its focus on technical strategy, recognizing the crucial role that technology plays in the modern educational landscape. By providing teachers with targeted training on technical aspects through Google Meet, the program empowers educators to navigate virtual classrooms with proficiency, ensuring a smoother transition to online teaching.

The use of Google Meet as the training platform is strategic, as it is a user-friendly and widely accessible tool. This choice enhances the program's inclusivity, allowing educators with varying levels of technological expertise to participate and benefit from the training. Moreover, Google Meet's interactive features can facilitate hands-on learning, enabling teachers to apply their technical skills in real-time.

PROGRAMME REPORT

NAME OF THE PROGRAMME : ONLINE TRAINING TECHNICAL STRATEGY THROUGH GOOGLE MEET FOR TEACHERS.

DATE : 17/07/2020

RESOURCE PERSON : Dr. JOHNSON.Y.

PROGRAMME OBJECTIVE :

Discuss the transition between traditional and online teaching models. Provide insights into adopting hybrid teaching approaches.

TOPIC COVERED :

This comprehensive set of topics aims to equip teachers with practical technical strategies for effective online training, fostering an engaging and successful virtual learning experience.

PROGRAMME OUTCOME :

- Improved technical skills for effective online instruction.
- Enhanced proficiency in using Google Meet for virtual teaching.
- Implementation of student engagement strategies in virtual classrooms.
- Increased ability to address common technical challenges in online education.
- Building a supportive virtual learning community among educators.
