ABOUT THE COLLEGE

Mother Theresa College of Engineering & Technology (MTTEC) was established in the year 1999. It has a well-planned campus with pollution free environment. It is located at Peddabonkur of Peddapalli district (Telangana). MTTEC has emerged as a pioneer venture in the field of Technological Education, one of the most well organized institutions in Telangana District(s). Aesthetically built buildings, Well furnished, lecture halls, library, workshop, Computer labs, Internet facility, conference hall, Seminar hall, laboratories and spacious playground, Indoor and outdoor sports facilities, intramural-extra Curricular facilities, associated hostels and canteen in the campus, offer an ideal environment for pursuit of a professional career. MTTEC has proven to be a turning point in the lives of many students, the place where many successes of stories begin.

ABOUT THE DEPARTMENT

The department of CSE established in 2008 with the approval of AICTE, is set in an open, student friendly atmosphere. The Department of Computer Science and Engineering (CSE) offers B.Tech course in CSE.

The Department has experienced faculty with good publication and well-established laboratories. The Computer science and engineering department of the college works with a motto of "Excellence in Computing Technology" stresses on strong understanding of theoretical concepts along with the practical experience with several challenging assignment and Projects.

ABOUT THE FDP:

The FDP on Cyber security and data forensic will be providing the basis knowledge of cyber security and data forensic. Cyber security is the protection of internet connected systems such as hardware, software and data from cyber threats. Electronic evidence is a component of almost all criminal activities and digital forensic support is crucial for law enforcement investigation. The combination of cyber security and data forensic is computer forensics. Computer forensic is the application of investigation and analysis techniques to gather and preserve evidence from a particular computing device in a way that is suitable for presentation in a court of law.

THE OBJECTIVE OF FDP:

The main objectives of this FDP is to impart technical knowledge on the following concepts on network security measures, vulnerability assessment and penetration testing, multi server authentication, design of secure protocol, light weight cryptosystem and ethical hacking.

TOPICS COVERED

- > Network security measures.
- > Cloud security engineering.
- > Network security.
- > Software and web application security malware analysis.

FDP OBJECTIVES:

The main objectives of this FDP is to impact technical knowledge on the following concepts on network security measures, vulnerability assessment and penetration testing, multi-server authentication, design of secure protocol, lightweight cryptosystem and ethical hacking.

TOPICS COVERED:

Introduction to cyber security, Network security measures, Vulnerability Assessment and penetration testing, Cloud security engineering, Network security, Software and web application security, Malware analysis, Multi server authentication, Design of secure protocol, Lightweight cryptosystem. IoT security, Cyber physical system security, Digital forensics.

ABOUT THE FDP:

Data science and machine learning are play a vital role in the modern industrial systems with the development of ICT, an information layer is now added to the conventional electricity transmission and distribution network for the data collection, storage and analysis. To make the system smarter, the emerging multi scale data from the synchrophasors, smart meters, and weather and electricity markets offers tremendous opportunities as well as challenges for the industry to dynamically learn and adaptively control modern power systems. The program will include expert lectures on data science and machine learning for power engineering application.

THE OBJECTIVE OF FDP:

The aim of this program is to provide opportunities to faculty members to learn, understand, and practice big data analytics and machine learning approaches, which include the study of modern computing big data techniques focusing on industry applications.

FDP OUTCOMES

Ability to select and implement machine learning techniques and computing environment that are suitable for the applications under consideration. Ability to understand and apply scaling up machine learning techniques and associated computing techniques and technologies. Ability to integrate machine learning libraries and mathematical and statistical tools with modern technologies

PROGRAM REPORT

Date: 01-10-2018

Name of the program: A One Week Faculty Development Program on Data Science and Machine Learning Application to Modern Power System

Date: 24-9-2018 to 29-9-2018

Details of the program:

Details of resource person:

Name	MR. YERUVAKA SANTOSH
Designation	ASSISTANT PROFESSOR
Department	CSE
Organization	JNTUH UNIVERSITY COLLEGE MANTHANI
Email id	anthosh.yeruvaka@gmail.com
Contact number	9573848820

FDP OBJECTIVES:

The aim of this program is to provide opportunities to faculty members to learn, understand and practice big data analysis and machine learning approaches, which include the study of modern computing big data techniques focusing on industry applications.

TOPICS COVERED:

An overview of data science. An overview of machine learning. Smart grid-architecture and models. Communication protocol for smart grid. Conventional and advanced machine learning. Algorithms for data analysis. Intelligent data collection devices in smart grid. Role

PRINCIPAL

of machine learning in smart grid. Advanced metering infrastructure and PMU. Data analysis in power quality. Digital substation.

OUTCOMES OF FDP:

Ability to select and implement machine learning techniques and computing environment that are suitable for the applications under consideration. Ability to understand and apply scaling up machine learning techniques and associated computing techniques and technologies. Ability to recognize and implement various ways of selecting suitable model parameters for different machine learning techniques. Ability to integrate machine learning libraries and mathematical and statistical tools with modern technologies.

ABOUT THE COLLEGE

Mother Theresa College of Engineering & Technology (MTEC) was established in the year 1999. It has a well-planned campus with pollution free environment. It is located at Peddabonkur of Peddapalli district (Telangana). MTEC has emerged as a pioneer venture in the field of Technological Education, one of the most well organized institutions in Telangana District(s). Aesthetically built buildings, Well furnished, lecture halls, library, workshop, Computer labs, Internet facility, conference hall, Seminar hall, laboratories and spacious playground, Indoor and outdoor sports facilities, intramural-extra Curricular facilities, associated hostels and canteen in the campus, offer an ideal environment for pursuit of a professional career. MTEC has proven to be a turning point in the lives of many students, the place where many successes of stories begin.

ABOUT THE DEPARTMENT

The department of CSE established in 2008 with the approval of AICTE, is set in an open, student friendly atmosphere. The Department of Computer Science and Engineering (CSE) offers B.Tech course in CSE.

The Department has experienced faculty with good publication and well-established laboratories. The Computer science and engineering department of the college works with a motto of "Excellence in Computing Technology" stresses on strong understanding of theoretical concepts along with the practical experience with several challenging assignment and Projects.

ABOUT THE FDP:

This FDP aims to up skill and train professionals in artificial intelligence and machine learning artificial intelligence and machine learning has taken the world by storm as major field of research and development python has surface as dominant language in AI /Programming because of its simplicity flexibility and support for open source libraries

THE OBJECTIVE OF FDP:

Learn the concept syntax semantics and gain introductory knowledge in machine learning principle through examples that provide useful exposure to various concepts of machine learning

TOPICS COVERED

- introduction of machine learning
- Evolution of machine learning
- Application of machine learning machine learning fundamentals
- Python basics
- Introduction of python
- Feature of python
- Working with python
- Basic syntax of python
- Core concept of python

PROGRAM REPORT

Date: 24-08-2018

Name of the program: A Non-Teaching Faculty Development Program on Personality Development Program on Government E- Market place

Date: 22-08-2018

Details of the program:

Details of resource person

Name	DR.EEDIIULA UPENDAR
Designation	ASSOCIATE PROFESSOR
Organization	MOTHER THERESSA COLLEGE OF ENGINEERING & TECHNOLOGY
Email id	Upendar@uohyd.ac.in
Contact number	9989959556

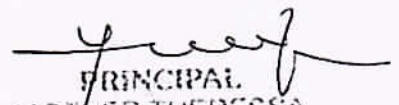

FDP OBJECTIVES:

Aims to improve the speed, efficiency, and transparency of public procurement. It provides e-bidding, reverses e-auction, and demand aggregation solutions to enable government users to get the most bangs for their buck

OUTCOMES OF FDP:

In an online marketplace, consumer transactions are processed by the marketplace operator and then delivered and fulfilled by the participating retailers or wholesalers. These type of websites allow users to register and sell single items to many items for a "post-selling" fee
