PROGRAM REPORT

"WOMEN IN LEADERSHIP"

MTCET, Peddapalli organized an importance on women in leadership on 02nd August 2022. Our College Principal discussing the importance of women in leadership. He talked about how women in leadership can help women to accelerate women's full and effective participation in leadership at all levels of decision-making in economic and public life, particularly in the fields of health, law, and economics. When women are visible in positions of leadership, it changes the very nature of what effective leadership looks like and begins chipping away at deeply rooted stereotypes and biases.

SOME TOPICS ENTITLED BY THE PRINCIPAL FOR STUDENTS:

Why focus on women in leadership?

In no country in the world do women have an equal role in setting policies, allocating resources, leading companies, or shaping markets. In many countries, more women are working than ever before, but compared to their male counterparts, they are not earning as much, rising as high, or being afforded an equal voice at work, at home, or in the community. Half the world's talent is left untapped, and we cannot make progress on gender equality or any other issues unless women can achieve their full potential. From health care and business to public office and the courts, women are underrepresented and undervalued. Yet women's representation in leadership positions has significant implications for health, justice, and prosperity for everyone.

Areas of focus

The Women in Leadership team focuses on three areas of opportunity:

- Individual empowerment,
- organizational change,
- Societal impact.

These are mutually reinforcing progress in one area requires progress in the others. Our strategy is designed to allow us, along with our partners, to consider and support this work as a whole. Individual empowerment When women have equitable access to training, role models, networking, and other tools that have traditionally been designed for men, they have the opportunity to accelerate their careers and promote organizational change from the inside. Organizational change when organizations enable equitable paths to leadership, their example and their strategies allow other organizations and entire sectors to do the same.

PROGRAM REPORT

“GENDER DATA & INSIGHTS”

MTCET, Peddapalli organized a program on Gender data & Insights on 10th November 2021. Our College Faculties discussing the importance on Gender data & Insights. Gendered gaps in data and insights are barriers to achieving greater, more equitable impact across many areas, including economic empowerment and adolescents' health and education outcomes. To develop the right solutions to advance gender equality, we must have the right data. For example, many health standards—from drug development and dosing guidelines to nutritional guidance—are based on males by default. We work to improve the collection, analysis, and use of data on the issues that matter most to women and girls. We also support partners in creating, testing, and advocating for the inclusion of indicators in key surveys that illuminate the lived experiences of women and girls. We are committed to developing and funding interventions that are underpinned by evidence, but if that evidence is biased in its definitions or excludes the factors that fully describe the experiences of women, we perpetuate solutions that have caused the gap in outcomes we see today. This is why we seek to improve the collection, analysis, and use of data on the issues that matter most to women and girls. For example, gender-based violence is a major risk factor for injury and death among women, but there are seven times more data indicators and measurements for risk factors such as smoking than for gender-based violence. This gap is even greater in low- and middle-income countries, leading to undercounting of the profound effects that gender-based violence can have on the lives of women and girls and underinvestment in solutions that could increase their safety. Our work includes generating more inclusive primary data, promoting gender-equitable data modeling, and ensuring that evidence quickly informs action. We support both internal foundation teams and external partners in creating, testing, and advocating for the inclusion of measures in key surveys to illuminate the lived experiences of women and girls.

The importance on Gender data & Insights program was a valuable resource for the students of MTCET College. It helped them to learn about the importance of education for women and to be inspired by the story of a successful woman. The program also helped to raise awareness of the challenges that women face in education. 30 students were attended.

PROGRAM REPORT

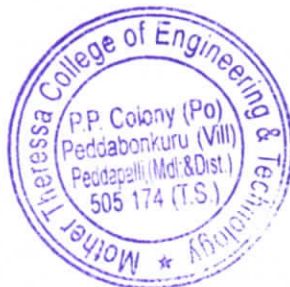

“LEGAL AWARENESS PROGRAM ON WOMEN SAFETY”

"Legal awareness program on women safety" was conducted on 07th January 2022. Mrs. Mounika S.I discussing the importance on Legal Awareness Program on Women Safety. An empower women and girls with the knowledge of their legal rights and duties, ultimately to be able to share power equally, gain full access to the means of development and to inspire a whole generation of women to work together towards achieving equality and justice.

The key points discussed in the session are outlined below.

i) Women and the Constitution: Apart from others, stress should be laid on Fundamental Rights. Constitutional Remedies (Writs), Electoral Law, Voting Rights for Women, participation in Panchayats. etc. iii) Women & Family Laws: Marriage Law, Separation, Divorce. Maintenance, Adoption, Family Laws, Right to Property and Succession, Guardianship, unmarried mother and the legitimacy of her children. iv) Women in Custody: Arrest, grounds of arrest, kinds of offences (bailable and non-bailable). arrest warrant, powers of police, rights of arrested persons including the right to bail, the immediate procedure to be adopted in case of violation of rights available etc. may be discussed with the help of case law in a more practical manner. v) Criminal Law and Women: Offences of dowry, rape, molestation, child rape and child abuse etc. Some recently decided cases may be discussed in detail. vi) Procedure in Action: Procedure for seeking redressal to be explained along with visits to Police Station, Courts, Lok Adalats, field studies etc.

The importance on "Legal awareness program on women safety" program was a valuable resource for the students of MTCET College. It helped them to learn about the importance of education for women and to be inspired by the story of a successful woman. The program also helped to raise awareness of the challenges that women face in education. 60 students were attended.

DATE: 11-03-2022

NAME OF THE PROGRAM: SAVE GIRL CHILD

PROGRAM REPORT

The program was organized on 11th March 2022. The main objective of this program was to create awareness on the importance of **SAVE CHILD GIRL**. The Chief Guest for the event was Mrs.N.Ramya. 73 students attended to this event.

Government has taken this step to let people know that a girl child is not a sin in the society however. She is a nice gift by God. A girl child should not be killed, hated or disrespected. She should be saved, loved and respected for the betterment of society and country. Why should we save girl children. They are also liable for the development and growth of a nation. However, the existence of the woman is for more important than men. The existence of the woman is for more important than men. Because without her we cannot think about our existence. So, to save humans from extinction we have to take measures to save girl child. It's a common practice in India where people abort or kill girl child on birth. But, they should be saved given equal opportunity, and respect and opportunity to go ahead in life. Apart from that, the fate of civilization lies in their hand as they are the root of our creation. The Guest speaks girls have proven themselves better in every field than boys. And due to their hard work and dedication, they have been to space also. They are more talented, obedient, hardworking, and responsible for the family and their life. Besides, girls are more caring and loving towards their parents. Above all, they give 100% in every work.

DATE: 30-04-2022

NAME OF THE PROGRAM: "AWARNESS ON WOMEN'S HEALTH INNOVATIONS"

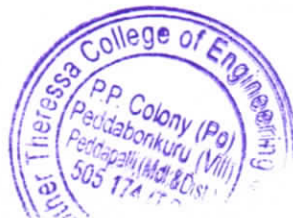

PROGRAM REPORT

The program was organized on 30 APRIL 2022. The main objective of this program was to create awareness on the importance of "AWARNESS ON WOMEN'S HEALTH INNOVATIONS". 87 students attended to this event.

Good health is necessary for women and children to thrive in all areas of their lives. So is the ability of women to make decisions about their health. As babies become children, children become adolescents, and adolescents become adults, their health needs change: Along with robust primary care, their circumstances might require access to better nutrition, family planning, or maternal care.

However, there has been a shocking lack of investment in understanding the biology of conditions that disproportionately affect women and girls, such as HPV and reproductive health tract infections, as well as how to prevent and treat them. A recent study that analyzed research funding from the U.S. National Institutes of Health (NIH) found a huge gender disparity: In nearly three-quarters of the cases where a disease has affected primarily one gender, NIH funding has favored males

Standard health R&D practices also tend to leave out women. For example, pregnant people were excluded from the COVID-19 vaccine trials even though the disease increases the risk of pregnancy complications and worse outcomes for mothers and babies. To unlock progress for women and for society, it is critical to ensure that women in low- and middle-income countries benefit from innovations in health technology, and that those innovations are designed and developed in a way that addresses their needs.
